Summary

Computer Science student at Florida Institute of Technology with hands-on experience in front-end development, software development, IT support, and technical troubleshooting. Experienced with web interfaces, APIs, GitHub, Visual Studio Code, Azure, AWS, and user-focused software solutions.

Education & Certifications

B.S. Computer Science	Florida Institute of Technology	Fall 2022 – Spring 2027
Microsoft Azure Fundamentals (AZ-900)	Microsoft	June 2026
AWS Cloud Practitioner	Amazon Web Services	August 2026

Technical Skills

Programming	Java, Python, C++, HTML, CSS
Web	Front-End Development, UI Development, APIs, Responsive Web Design
Tools	Git, GitHub, Visual Studio Code
Cloud	Microsoft Azure, AWS
Systems	Linux, SSH, DNS Filtering, Windows Deployment, Hardware Configuration
Technical	IT Support, Troubleshooting, PC Building, OS Deployment
Creative	Blender, CAD, 3D Printing, Digital Art, Project Planning

Work Experience

IT Information Help Desk, Florida Institute of Technology	Summer 2023 – Fall 2025
--	-------------------------

- Resolved hardware, software, and operating system issues for students, faculty, and staff through phone, in-person, and on-site support.
- Reimaged, configured, maintained, and deployed Windows computers for campus and administrative use.
- Diagnosed technical issues to minimize downtime and maintain reliable campus technology services.
- Collaborated with IT staff on troubleshooting, system maintenance, and campus technology initiatives.

Projects

Canvas Reconstruction Extension

- Redesigned the Canvas LMS interface using HTML and CSS with customized layouts and UI improvements.
- Published the custom theme publicly through the Stylish browser extension platform.

Discord MeowBot

- Developed a Python Discord bot for community management.
- Automated scheduling, events, polls, greetings, and user engagement features.

Teacher Attendance Application

- Developed a solution for teacher attendance and payroll tracking.
- Implemented timestamp verification and attendance monitoring to improve record accuracy.

Breast Cancer Detection Using AI

- Collaborated on AI-assisted breast cancer detection research.
- Evaluated machine learning models for diagnostic accuracy and efficiency.

Network Ad Blocker

- Collaborated on a DNS-based network ad-blocking system.
- Used Linux, SSH, DNS filtering, networking, and system administration concepts.
